

**General National Congress - Libya  
Council of Ministers  
Control Centre for Food & Medicine**

Quarantine requirements on importing of agriculture sprouts & plants from abroad.

- 1- Prohibited and banned species and categories are not allowed (fruitful palm, decorative palm).
  - 2- Imported shipments should be free of any pests and plant disease.
  - 3- Plants should be free of natural soil.
  - 4- Related Health Certificate issued by relevant authority from the exporting country proving that the shipment is free from any quarantine pests which is in conformity to the International Agricultural Quarantine Legislation in Libya.
  - 5- Packing should ensure that the relevant shipment is not affected or damaged, which in away is appropriate for plant shipment in order to exclude any external influence.
- 1- In case of breach of any of the mentioned conditions the supplier is committed to comply to the decision of the inspector of the Control Centre for Food and Medicine related to the imported shipment. Implement and execute shipment refusal, re-export procedure, chemical treatment, or supervised destruction by the inspectors from the mentioned centre.
